EJ-TECHNOLOGIES LAUNCHES EXE4J, A WINDOWS INTEGRATION TOOL FOR THE JAVA DEVELOPMENT COMMUNITY

EXE4J: a Tool Designed to Help Developers Integrate Their Java Applications into the Windows Operating Environments

Munich, Germany, Oct. 09, 2002 – ej-technologies GmbH launched today an innovative tool, *exe4j*, designed to help developers integrate their Java™ applications in Windows™ operating environments. *exe4j* is a Java exe maker that allows developers to start their Java applications reliably, displaying native splash screens, detecting suitable Java Runtime Environments (JREs) and handling startup errors while operating in a Windows environment.

"Starting Java applications on Windows is a frequent point of failure and often leads to serious usability problems. *exe4j* makes the process of starting Java applications in Windows operating environments much simpler and safer," said Dr. Ingo Kegel, CEO of ej-technologies. "With the addition of *exe4j* to our product line, we continue to deliver on our promise to provide developers worldwide with the latest tool technologies to simplify and speed up the development of Java applications."

ej-technologies' *exe4j* offers the following features:

- Creation of individualized Windows launcher executables for Java applications
- Detection of appropriate Java Runtime Environments on startup
- Optional distribution of bundled JREs
- Extensive startup failure detection
- Fully configurable native splash screen that gives immediate feedback to users of Java applications
- Compilation of GUI applications or console applications
- User friendly wizard for configuring an *exe4j* project
- Command line compiler for integration with automated build process

exe4j is available immediately worldwide for $69.00 per license and can be downloaded for a free evaluation at http://www.ej-technologies.com/products/exe4j/overview.html. A site license is also available for $690.00
