Best-of-breed Java Tools Team Up In JetBrains Companion Products Program

Award-winning JProfiler becomes latest IntelliJ IDEA companion product

Prague and Munich - February 27, 2006 - JetBrains, creators of intelligent, productivity-enhancing applications, today announced that JProfiler, the award-winning Java application profiling tool from ej-technologies, has joined the growing ranks of JetBrains-certified Companions for IntelliJ IDEA, the JetBrains flagship Java IDE (integrated development environment).

The JetBrains Companion Products Program provides developers a centralized resource for high quality third-party extensions for IntelliJ IDEA. All JetBrains Companions are carefully screened and tested at JetBrains to ensure a solid integration.

"This is an important event for Java developers," said Alex Tkachman, Marketing Director for JetBrains. "For the first time, an award-winning Java IDE has teamed with an award-winning Java profiler to provide best-of-breed power in both areas. This 1-2 combo means Java developers can now ensure that their applications are as efficient as they themselves are productive as developers using IntelliJ IDEA."

"At ej-technologies we're very excited about being part of JetBrains' 'best of breed' partner program," said Dr. Ingo Kegel, CEO of ej-technologies. "Java developers will be able to get to know and acquire a wide range of excellent tools and components from a single source."

JetBrains and ej-technologies also jointly announced a special Companion Program pricing arrangement for their products. Existing IntelliJ IDEA customers are eligible for a 10% discount on the Standard Per-Developer JProfiler License, and existing JProfiler customers can get the same discount on the Commercial License for IntelliJ IDEA.

JetBrains maintains a dedicated Companion Products Program web site, featuring commercial-grade add-ons that further enhance and extend IntelliJ IDEA's already robust feature set. The site is located at <http://companions.jetbrains.com>.

Information about JProfiler is available on the JetBrains Companions site at: <http://companions.jetbrains.com/jprofiler>. Developers can download a free 10-day trial copy of JProfiler at: <http://companions.jetbrains.com/jprofiler/download.html>.

A new single-developer license for JProfiler is priced at \$499 (US) and can be ordered online at <http://companions.jetbrains.com/jprofiler/license.html>. Other licensing and pricing options are available at the site.

Information about IntelliJ IDEA is available on line at <http://www.jetbrains.com/idea>. Downloads and a free 30-day trial license are available at <http://www.jetbrains.com/idea/download/>. A new single-developer Commercial License is priced at \$499 (US) and can be purchased online at <http://www.jetbrains.com/idea/buy/buy.html>. Other licensing and pricing options are available, including competitive upgrades for users of other Java IDE products.

About ej-technologies

ej-technologies GmbH of Munich, Germany, was founded in 2001 as a privately held company and specializes in solutions that help programmers make the most of their own applications. With its focused expertise in the areas of performance and deployment, ej-technologies is developing the next generation of enterprise application development tools.

About JetBrains

JetBrains is a technology-leading software development firm specializing in the creation of intelligent, productivity-enhancing software. The company is widely known for its innovative, award-winning Java integrated development environment, IntelliJ IDEA (see details on the Web at <http://www.jetbrains.com/idea/>), ReSharper for C# developers (see <http://www.jetbrains.com/resharper/>), dotTrace profiler for .NET applications (see <http://www.jetbrains.com/profiler/>) and TMate advanced CVS and Subversion management for IntelliJ IDEA (see <http://www.jetbrains.com/tmate/>). JetBrains maintains its headquarters in Prague, Czech Republic, with its R&D labs located in St. Petersburg, Russia and Boston, Massachusetts. For more information, see <http://www.jetbrains.com>.
